**Xaringan, not Sharingan!**

# What is Xaringan?

- Xaringan is a R package for creating slideshows through R Markdown.
- You can use R Markdown through **RStudio** and it is easy to get started too.
- All you need is go from the menu **File -> New File -> R Markdown -> From Template -> Ninja Presentation**, then you will be able to view it by pressing the **Knit** button.

# Benefits Using Xaringan

- If you don't want have **Powerpoint** and don't want to use **Google Slides**, this can be a great tool for school!
- **IT CAN SAVE YOU TIME!!!**
- It's a good path to introduce you to programming!
- It will look good in your resume: **Proficient in RStudios**
